ì

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 1. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Britzke, et al. (U.S. Patent number 5,931,542) in view of Jelinek (U.S. Patent number 4,702,657).

Britzke teaches a tool assembly with tool, retainer sleeve and washer. Britzke fails to teach the layer of compressible material bonded to the inner annular surface of the washer.

Jelinek teaches a washer with a layer of compressible material bonded to the inner annular surface of the washer; which is disclosed as being able to facilitate preassembly and handling.

It would have been obvious to one of ordinary skill in the art at the time of the invention to have modified the Britzke assembly to have the layer of compressible material bonded to the inner annular surface of the washer as called for in claim 1, in order to facilitate preassembly of the tool.

With regards to claim 2; it would have been obvious to one of ordinary skill in the art at the time of the invention to have made the inner surface f the compressible

Art Unit: 3673

material to have a diameter less than the mounting hole; since Jelinek teaches the same.

With regards to claim 3; Jelinek teaches the elastomeric member.

Allowable Subject Matter

2. Claims 4-15 are allowed.

The prior art includes Papenguth (U.S. Patent number 3,259,404) and Dimitry (U.S. Patent number 3,726,178) which teach similar washers. The prior art of record fails to disclose or suggest such an assembly in which the washer fitted around the shank of the tool and is retained against rotation with the tool.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Kreck whose telephone number is (703)308-2725. The examiner can normally be reached on M-F 5:30 am - 2:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather Shackelford can be reached on (703)308-2978. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
